WHAT IS CORK?
什麼是軟木?

Cork comes from the outer bark of the cork oak tree. It is harvested without cutting the tree down, allowing the bark to grow back naturally over time.
軟木取自軟木橡樹的外層樹皮。採收時無需砍伐樹木，樹皮會隨著時間自然再生。

This gives cork a rare balance of qualities: it is natural in origin, warm in appearance, light in weight, and highly adaptable for interior wall applications.
這也賦予軟木少見的多重特質：源自天然、外觀溫潤、重量輕盈，並且能靈活應用於室內牆面設計。

Harvesting Story

採收故事

The first harvest usually takes place when the tree is around 25 years old. After that, the bark can be harvested again in cycles of roughly 9 to 12 years.
軟木的第一次採收，通常會在樹木生長至約 25 年時進行。此後，樹皮可依大約 9 至 12 年的週期再次採收。

In many cork forests, trees are marked after harvest to indicate the year of the last stripping, helping preserve the natural rhythm of regeneration.
在許多軟木林中，樹木會在採收後被標記，以記錄上一次剝取樹皮的年份，幫助維持其自然再生的節奏。

Built to Belong

Warmth you can feel. Calm you can hear.

感受得到的暖意，聽得見的寧靜。

Cork brings a quieter kind of comfort to interior spaces. Its natural texture softens the visual language of a room, while its acoustic qualities help reduce harsh reflections and create a calmer atmosphere. More than a surface, cork becomes part of how a space feels: warmer, softer, and more human.

軟木為室內空間帶來一種更安靜的舒適感。它的自然肌理柔化了空間的視覺語言，而其聲學特性則有助於減少刺耳的聲音反射，營造更平和的氛圍。
軟木不只是表面材料，更會成為空間感受的一部分：更有暖意、更柔和，也更貼近人的尺度。
